

Millbrook  
Tuam  
Ireland

1881 Sept. 8

Dear Sir

I am glad to see in  
the A.N. that you  
have been observing  
the new red star that  
I found in Cygnus  
on May 22.

It is, doubtless, a variable

as, after reaching about  
& magnitude on June 6,  
it seems now not  
more than 10.

I hope you have  
got my Red Star  
catalogue which I  
sent to my good, and  
sincerely lamented  
friend, Father Secchi,

your predecessor at  
the C. R.

Believe me, dear  
Sir, yours very  
faithfully

Birmingham

Prof. P. Tacchini
