PRIZE MEDAL.

1862.

JOHN BROWNING,

Optical and Physical Instrument Maker to
Her Majesty's Government,
The Royal Observatory, the Royal Society,
and the Observatories of Cambridge,
Utrecht, &c., &c.

6 April 1877

Sir,

I beg to acknowledge receipt of your esteemed favor, with an order for a Mr. Blean's Star Spectroscope at 50/- and one of Dr. Huggins' best Star Spectroscopes at £21.0.0. I will make the instruments of such a size that you can cut a screw on the end of it to fit your telescope, following the design of the eyepiece which you have kindly sent me. I will very shortly advise you that the instruments are completed, and shall be glad to enclose with them either any further apparatus for you, or anything you may wish forwarded from any other person from London or England.

With best thanks, I am,

Yours very truly,

John Browning

Prof. P. Tacchini

P.T.0

B. Please accept my sincere thanks for
the copy you have kindly sent me of the
observations of the transit of Venus: they
are beautifully printed, and the plates
are very fine. I am pleased to see also
appended, the report of the Rev. R. P. S. Lafont,
as I have made some large and valuable
instruments for this gentleman.

Yours very truly,
John Herschel

Prof. G. B. ...
