

Buckingham Works,

T. COOKE & SONS.

York, 11th Aug: 1882

P. Jaulinij (?)
Direttore R. Osservatorio
del
Collegio Romano -

Dear Sir,

We have much pleasure
in enclosing photographs of
our two forms of Equatorial
Telescopes & also send per same
post one of our Illustrated
Catalogues which we trust will
be of service to you - the two
smaller photos are of the
same instrument but different
positions - since this photo was
taken we have made one
alteration

viz. the Declination
Circle is read from the eye-end
instead of being placed at the
bottom of the Dec. Axis -

Assuring you that any orders
entrusted to us shall at all
times meet with our careful
attention -

We are, Dear Sir,

Your obedient servts.

T. Cooke Sons -
