

ROYAL OBSERVATORY
EDINBURGH

3rd Decr. 1898-

To

Professor P. Tacchini,
R. Osservatorio del
Collegio Romano -
Rome -

Dear Sir, Many thanks for your note
of the 27th respecting the non-appearance of
the Biela Meteor on November 24th at
your observatory although the sky was
clear - As yet I have not heard of
any watch that was kept at stations
further to the east, although it is probable
that the Russian astronomers would be
on the look-out - Many thanks for so kindly
looking for the meteor on the 24th. Believe me

Very faithfully yours
Ralph Copeland.
