Prof Tacchini

Dear Sir

I have just had some photographs taken & though it is a long time since your kind letter requesting one, came to hand I enclose a specimen thinking that it is better to be late than never. Will you not do me the favor to reciprocate and let me see your face on paper until I can have an

opportunity to see you in the
flesh.

I am looking forward
with much pleasure to working
with my telescope as soon as the
weather moderates. The winter has
been very severe and on several
occasions the thermometer has
nearly reached $0^{\circ} F$. No man can
do good work under such cir-
-cumstances.

With best wishes for your
health I remain

Yours truly
Henry Draper
