

OFFICE OF
ASTRONOMY AND ASTRO-PHYSICS.
DEPARTMENT OF ASTRO-PHYSICS.
GEORGE E. MALE - EDITOR.

University of Chicago,
Kenwood Observatory.

Chicago, 189

Hamer & Swasey, Brashear, Saegmuller and others, objectives by Merz, optical glass from Jena, prisms and lenses from Brashear, Zeiss, Steinheil and others, Rowland gratings, spectroscopes and spectrometers, etc., etc. The collection of astronomical photographs is very fine, the Harvard Observatory exhibit being particularly interesting.

Will you not kindly send me, from now until October, an extra copy of each number of the "Memorie", so that they may be placed with other journals in a small reading room, which has been arranged for the convenience of visiting astronomers? "Astronomy and Astro-Physics", "The Observatory", and several other journals will be on file in the same place, which adjoins your exhibit.

Hoping to see you in the near future, and with kind regards, I am

Very sincerely yours
George E. Hale
