GEORGE E. HALE, EDITOR.

Kenwood Astro-Physical Observatory.

Chicago, July 28 1892

Dear Professor Tacchini:-

I am very greatly pleased to know that you will come to our astronomical Congress in Chicago next year, ~~for~~ after going to the total eclipse in South America. The congress will be held from July 1 to July 15, and I assure you that everything possible will be done to make your stay agreeable.

I enclose a paper for the "Memorie", and have given orders that the plates to illustrate it be sent to you at once.

I have recently found three more hydrogen lines beyond Dr. Huggins' white star series in the prominences (up to and including H_1), and two more new lines belonging to other substances.

Very sincerely yours
George E. Hale
