

Royal Astronomical Society,

BURLINGTON HOUSE, LONDON,

W.

30th Nov 1876

Sir

I find that owing to an
unfortunate misunderstanding as to
who was to act as the English

Secretary of the Jupiter Committee

Your letter of the 26th of August

last has remained unanswered

The drawings were however forwarded

shortly after the receipt of your letter

to Dr. Lohse of Berlin who is at

Prof. Tacchini & &
Palermo.

present preparing a report upon them

All the drawings which have been

received in answer to the appeal of

the Jupiter Committee will ultimately

be deposited for reference in the

Library of our Society. I have

requested Mr. Wesley to send you some

more Jupiter diagrams - If you are
kind enough to send us any more
drawings we shall be much obliged
if you will kindly state the aperture and
power used in making each drawing
We assumed that the drawings sent
were all made with your large
instrument

I have the honour to be

Sir
Yours obediently
A. Cowper Ranyard
